

## **Pink Plumbers Thread Sealant Tape**

### **Technical Data (Rev 0 – 10/14/14)**

Page 1 of 1

#### **Description**

TFCO Inc. Pink Plumbers Thread Sealant Tape is the ideal solution for sealing water, steam and other threaded pipe connections up to 2" diameter. Our Pink Tape is a High Density tape that is thicker and denser than most other tapes. It provides a tight seal while providing natural lubrication to prevent damage of the threads. Made almost entirely of PTFE (a pigment is added for coloring), it is resistant to most common chemicals, and is rated for temperatures from -450 deg F to +500 deg F. Available in 3 different widths, our Pink Plumbers Tape can be used in virtually any application (not suitable for Oxygen). It's pink color prevents it from being confused with lighter tapes.

#### **Technical Data**

Applications	Water, Steam and most common chemicals
Density	0.8-1.1 g/cc
Thickness	3.5 mils +/- 10%
Pressure Rating	10,000 psi
Temperature Rating	-450 deg F to 500 deg F
Specification	MIL-SPEC T27730A

#### **General Specifications:**

Composition	>99.5% PTFE; <0.5% color pigment
Color	Pink
Widths	1/2", 3/4", 1"
Maximum Pipe Size	2"
Miscellaneous Properties	No Age Deterioration
	Non-Toxic
	Non-Absorbent
	Non-Flammable
	Self-Lubricating
	Unlimited Shelf Life
Country of Manufacture	USA
